Machinery & Equipment Product Guide
and Case Studies

Adelphi
Manufacturing

A personal approach, on a global scale

Established in 1947 as a manufacturer of simple bottle washing and filling equipment for the pharmaceutical industry, the Adelphi Group of Companies has grown organically and also through strategic acquisitions, to become an industry-leading global business, exporting equipment to over 110 countries around the world.

ISO 9001:2015 certification guarantees the quality of our processes and procedures, and our award-winning team manufacture a portfolio of specialist equipment for the Cosmetics & Personal Care industry, which meets GMP requirements as well as international pharma-quality standards.

This Product Guide demonstrates our hygienic, high quality solutions for companies manufacturing, filling and distributing oils, creams, serums, scrubs and more. Manufactured from contaminant-free materials to meet strict compliance regulations, a comprehensive range of compliance certification is available to confirm the grade of material, to prove surface smoothness, and to guarantee that no cross-contamination from BSE or CJD diseases occurs.

The Adelphi Group of Companies shares many values with our customers in the Cosmetics & Personal Care industry; notably a keen focus on quality, safety and consistency. As a global company, we always strive to play our part in addressing societal and sustainability concerns, and we are committed to ensuring that our operations will always remain true to these values we share with our customers.

Chris Wilson
Managing Director, Adelphi Group of Companies

001

XYZ Distributor

The XYZ Distributor is designed to be used in conjunction with the Accuramatic Peristaltic Dispenser, and enables small containers to be filled automatically in trays. The Z axis is the diving nozzle movement that allows your products to be automatically filled from above the neck or into the neck.

Item code	Specification
3525000	XYZ DISTRIBUTOR
Electricity (selectable)	240V AC, 50/60 Hz, 500W (120V optional)
Movement space (mm)	X = 520, Y= 335, Z= 155
Electronics	Mircoprocessor
Weight (kg)	Control: 4.5. XYZ: 9.0
Distributor dimensions (mm)	790 x 625 x 390
Control dimensions (mm)	200 x 280 x 180
Drip delay	0.0 – 0.9 secs
Max vial height (mm)	200
Min neck opening (mm)	8
Tray fill area (mm)	410 x 265

Features:

- Control box remote from moving nozzle frame suitable for use in laminar flow cabinet
- Adjustable trays are supplied so that bottles are held in an orderly fashion
- Setting up is easy using the menu-driven LCD displays
- Special trays can be made to suit odd shaped bottles
- Fills straight rows or honeycombed configurations

Accuramatic Peristaltic Dispensing Unit

This unit can be operated by hand, foot switch, or will cycle automatically with a delay of up to 10 seconds between fills. The pump runs at a constant speed for a precisely determined period of up to 100 seconds, can run forwards or backwards, and has a choice of three filling modes: Braked stop – Soft stop – Stop with suck back.

Like all peristaltic pumps the liquid only comes into contact with the inside of one uninterrupted length of silicone tubing which will withstand repeated sterilisation. Bacteriological inline filtration can be performed at the outlet side of the pump. This Peristaltic Dispenser can be combined with our XYZ Distributor to offer quick, easy, and hygienic filling of whole trays of your bottles automatically.

Item code	Specification
3510000	PERISTALTIC DISPENSER
Volumes (ml)	1 to 1,000
Repeatability	± 0.5%
Max flow rate (ml)	36 ml/sec (standard pump. Twin pump option available)
Electricity	240V AC, 50 Hz, 50W (120V optional)
Weight (kg)	Nett 8.5, Gross 10.5
Carton size (cm)	44 x 23 x 43

SEMI-AUTOMATIC FILLING

Response Benchtop Filler

Our Response range of filling machinery was developed in response to our customers' requests, hence the name!

Designed to meet pharmaceutical standards, all Response machines are versatile, hygienic and easy to use. Their stylish exteriors conceal well-engineered and robust filling systems.

The highly regarded Response Benchtop Filler is a semi-automatic filling machine, available in single or twin-head configurations, with a comprehensive range of nozzles, hoppers and other accessories available to meet your individual requirements. This pneumatically driven filler is perfect for filling oils, creams, serums, scrubs and more, thanks to its versatile filling head design.

Read the Case Study of customer Eve Taylor London Ltd on page 9.

The Response Benchtop Filler is ideally suited to those wanting to start automating a previously manual filling process, and those that don't currently require the output levels offered by a fully automated solution. However, once production demands increase, Response benchtop filling units can be up-scaled, by mounting the original filler onto a Response Monobloc or a Response Automation System, to create an extremely flexible fully automatic filling machine.

	Specification (single head)
Accuracy	±0.25%
Output	Up to 40 per minute (dependent on fill volume)
Height without hopper / tank	340mm
Depth	840mm
Width without conveyor	343 mm
Weight	41 kg
Air consumption per cycle	5 litres at 6 bar
Volume range	5 ml – 1 litre

AUTOMATIC FILLING

Response Monobloc Filler/Capper

Adelphi’s Response Monobloc Filler provides many advantages for Cosmetics & Personal Care manufacturers compared with traditional inline packaging systems.

Key Features and Benefits:

- Capable of filling 5ml to 250ml containers
- Space-saving design
- Ten-minute strip down time
- Hygienic stainless steel construction; all wetted parts are 316L stainless steel
- Response volumetric filler fill-accuracy +/- 0.25%
- Quick and easy to change parts from one fill-size container to another
- Easy-to-use intuitive HMI touch screen controls for your operator
- Designed to effectively handle liquids, oils, creams, pastes and solids in suspension
- Speed of operation in the region of 35 per minute
- Reduced labour costs

The Response Monobloc Filler can incorporate the following elements to give a complete turnkey packaging line:

- In-feed table
- Bottle blower
- Filler
- Automatic cap placement
- Capper
- Labeller
- Collection table

	Specification
Accuracy	±0.25%
Output (per minute)	30 - 35
Height without hopper / tank	2032 mm
Depth	810 mm
Width without conveyor	1120 mm
Weight (approx)	275 kg (plus Response base unit and hopper)
Air consumption per cycle	7.5 litres at 6 bar
Volume range	5 ml – 250ml
Electrical consumption	Single phase 240VAC, 13A supply
Maximum bottle diameter	85 mm (outer diameter)
Maximum bottle height	250 mm
Maximum cap diameter	45 mm

Suitable container dimensions:
External diameter up to 85mm
Height up to 250mm
Cap diameter up to 45mm

Response Automation Base

Key Features and Options:

- Variable speed conveyor with adjustable guides, rails, and delrin or stainless steel slats
- Logic controls for gating and sensing systems and up to four Response fillers
- Neck location system
- Pneumatic cut-off nozzles to ensure a clean fill with no dripping
- ‘Rise while fill’ or ‘bottom up fill’ of container, into neck or fixed nozzle fill system
- Fully interlocked guarding around operating area
- Frame mounted hopper or tank with up to four triclover outlets, manifold and heated jacket
- Other bespoke additions depending on your requirements

	Specification
MODEL	AUTOMATION BASE
Accuracy	±0.25%
Output (per minute)	Dependent
Height without hopper / tank	1800 mm
Depth	1070 mm
Width without conveyor	1650 mm
Weight	396 kg + Responses
Air consumption per cycle	40 litres per cycle
Volume range	5 ml–1 litre

(Above) Automation Base with three Response units fitted; seen from the rear

Automation Base with three Response units fitted; operator’s view from the front

“We receive maximum benefit and value from the machine. We have the Response Automation producing on average 5,000 units a day on an 8 hour shift.”

Greg Suarez - Production Manager, Barry M Cosmetics. Read the full Case Study on Page 8.

Pharma Hygiene Products (part of the Adelphi Group of Companies) supply stainless steel process equipment to Cosmetics & Personal Care industry manufacturers who need to obtain the optimum levels of hygiene with their production processes.

From storage to mixing and transportation, Pharma Hygiene Products' range is manufactured to the highest quality, and is designed to suit every stage of the production process.

Mixing and Storage Containers

Manufactured from 316L and 304 grade stainless steel, these containers can be supplied either plain or graduated, and come complete with side handles and skirtband. They have hygienic crevice and pit-free interiors, and are polished throughout. An optional lid is available for all sizes.

Integrated mixers can also be incorporated into the lids of these containers.

- Notes:
- 1. Graduations: 5-20/5 = graduated from 5 litres to 20 litres in 5 litre intervals.
 - 2. In the data table, replace the * with 4 if 304 grade is required, or with 6 if 316L grade is required.
 - 3. Where no * occurs in the item code, material is 304 grade.

A number of optional modifications are available, please contact us for further details.

Mobile Frames for Containers

Manufactured from 304 stainless steel, Pharma Hygiene Products offer both a standard range of mobile frames on castors for containers 20 - 240L, as well as tilted mobile frames for decanting from your container. A single frame fits both our standard 75L and 150L vessels. The angle of tilt means that when decanting your products, the container can drain completely with no liquid pooling.

Standard mobile frames for 20L - 240L containers

Mobile frame with 75L container (left) and 150L container (right)

Cans with Lids

Manufactured from either 304 or 316L grade stainless steel, these cans come complete with lids and swing handles. They have hygienic crevice and pit-free interiors, and are polished throughout.

Note: in the data table below, replace * with a 4 if 304 grade is required, or with a 6 if 316L grade is required.

A number of optional modifications are available, please contact us for further details.

Buckets and Pails

(A) Buckets

Manufactured from 304 grade stainless steel with one size available in 316L stainless steel, these buckets are polished throughout, graduated in 1 litre intervals and come complete with swing handle. Skirtbands are standard as shown. Buckets without a skirtband are available to special order. Lids are available as an option.

A Buckets
B Heavy duty bucket
C Pails
D Buckets with spouts

Item code	Capacity (litres)	a	b	c	Skirt	Handle	Grad.	Weight (Kg)	Lid Code	Lid Weight (kg)

Note: In the data tables replace the * with 4 if 304 grade is required, or with 6 if 316L grade is required.

A number of optional modifications are available, please speak to a sales representative for further details.

Polypropylene Vessels

Pharma Hygiene Products can supply a range of mobile polypropylene vessels for products that cannot come into contact with stainless steel.

These vessels have welded seams and are supplied with drop on lids. An external stainless steel band can be added with two carrying handles to aid moving when empty. A mobile frame set on four castors (two braked) is an optional extra.

Propeller or high shear mixers can also be supplied, and the vessels are available in various sizes.

Please enquire for further information.

Paddle Stirrer

This paddle stirrer is formed in one piece and manufactured from 316L pharmaceutical grade stainless steel, ensuring the highest levels of hygiene when mixing CBD oils in a vessel.

Item code	a (mm)	b (mm)	c (mm)	Weight (kg)
PAD6200	1000	125	260	1.2
PAD6200-1300	1300	125	260	1.5

Integrated Mixers & Agitators

Pharma Hygiene Products can supply a wide variety of mixers and agitators, and mount them on our standard and custom vessels and containers to meet your specific requirements.

We offer high-shear mixers for mixing emulsions, propeller mixers for free dissolving powders, as well as general mixing, and slow agitators for keeping products suspended. All can be supplied in varying power and speed specifications.

Please enquire for further information.

We can add a Water Jacket to your mixing vessel; ideal for products with wax ingredients, including hand creams, lipsticks and candles, where wax and pigment are combined in the vessel before moulding.

Mobile Mixers for Vessels & Containers

Manufactured from 304 grade stainless steel, with 316L grade contact parts, these mixers are designed for use with any open container of suitable dimensions.

Available with either high-shear mixing head (shown) for mixing emulsions, or a propeller mixing head for mixing free dissolving powders and for general mixing.

The mixing head is mounted on a mobile stand with painted hydraulic cylinder (manually operated), and the control panel is IP55 rated and constructed of stainless steel. Mixers can be specified with 3 phase or single phase power options.

Safety interlocks and a motor shroud are further options.

Item code	Model	Operating rpm
CSP-HM	Mobile high-shear mixer	2900
CSP-PM	Mobile propeller mixer	1400

A

B

Measuring Jugs

Heavy Duty Measuring Jugs (A)

Manufactured from 304 and 316L grade stainless steel, these jugs are straight sided, graduated and come with a pouring spout and closed side handle. They have crevice- and pit-free interiors and are polished throughout.

Item code	Capacity (litres)	a	b	Handle	Graduation	Weight (gm)
JUM*0.5G	0.5	75	135	SIDE	0.1-0.5/0.1	285
JUM*001G	1	100	135	SIDE	0.2-1/0.2	475
JUM*002G	2	135	170	SIDE	0.2-2/0.2	690

Note: In the table above replace the * with 4 if 304 grade is required, or with 6 if 316L grade is required.

Light Duty Measuring Jugs (B)

Manufactured from 304 grade, these jugs are tapered and come with either an open or closed handle. They are graduated in pints and litres, have crevice- and pit-free interiors and are polished throughout. The option of rimmed feet is available with the closed handle version from 0.5 litre upwards.

Item code	Capacity (litres)	a	b	c	Handle	Graduation	Weight (gm)
MEA40.1G	0.1	75	40	45	OPEN	0.05-0.1/0.05	40
MEA4.25G	0.25	100	50	70	OPEN	0.05-0.25/0.05	65

ME*4001G	1	150	75	135	OPEN/CLOSED	0.1-1/0.1	200
ME*41.5G	1.5	155	85	150	OPEN/CLOSED	0.1-1.5/0.1	290
ME*4002G	2	170	85	200	OPEN/CLOSED	0.2-2/0.1	320

Note: In the table above replace the * with an A if an open handle is required, or with a C if a closed handle is required. For a rimmed foot, replace G with R.

International cosmetics giant increases productivity and versatility using Adelphi machinery

The Challenge:

An increase in new product development at Barry M – particularly festival themed cosmetics such as glitter fixer gels – left their existing fillers unable to keep up with production demands.

The Solution:

Incorporating Barry M's existing Response Benchtop filling machines into a new Response Automation Base, has maximised value-for-money and adaptability. Adelphi also integrated a capping machine, to create a complete packaging line. The cost-effective set-up achieves vastly improved outputs of 5,000 units per day.

"We receive maximum benefit and value from the machine," says Barry M's Production Manager Greg Suarez. "We have the Response Automation producing on average 5,000 units a day on an 8 hour shift."

Barry M are a world-leader in their field, manufacturing vivid and vibrant cosmetics at affordable prices. Like Adelphi, Barry M only produce products of the highest quality.

Flexible & Scalable

The Response Automation Base holds up to four Response Benchtop Fillers, which can be taken away at any time and used as stand-alone, semi-automatic fillers. This flexible system can be constructed or deconstructed to fit production requirements, saving Barry M the need to invest in multiple machines. It can convert from a fully automatic 8-head filler, into four benchtop fillers, within just 30 minutes, so no production time is wasted. This system adds value for businesses of all sizes, and for companies like Barry M who invested in the Response Benchtop Filler first, it means that the initial outlay is never made obsolete.

Proven Reliability

With Response Benchtop Fillers already in place, it made sense for Barry M to stick with machinery which had proved reliable in the past. Greg commented that "we needed reliable equipment that wouldn't let us down. Knowing Adelphi's machinery as we do, we felt confident this would be achieved. The Response's easy operation and its versatility with filling different products ensures that we receive maximum benefit and value from the machine".

Save Time & Money

"The Response can be adapted quickly to different fill sizes and container types, which benefits us greatly with the variety of products we fill. We also find the change parts on the machine really quick and easy to swap over when we change production runs, so we can keep the machine clean between fills with minimal effort", says Greg.

Seamless Collaboration

Barry M also depend upon high-grade stainless steel mixing vessels for use in their manufacturing hub, as well as floor standing mixers for production mobility. Adelphi Group company Pharma Hygiene Products Ltd supplies vessels and mixers in 304 and 316L grade stainless steel, which maintain the highest standards of hygiene for Barry M's production. Purchasing from one group of companies simplifies and speeds up the purchasing process.

Improved efficiency; time and money savings for Eve Taylor (London) Ltd

Eve Taylor (London) Ltd is an innovative creator of aromatherapy skin and body care products, including oils, creams, serums, gels and more – their global customer base includes thriving markets in Singapore, Manila, USA, Korea and Australia.

The Challenge:

In 2005, the company began to develop their own range of professional and retail skin and body care, to complement the established range of aromatherapy oils. They needed a new filler which could handle the complete product range, including oils, serums, liquids and creams.

The Solution:

Eve Taylor now utilise three Response Benchtop Fillers, described by their Director Chris Taylor as:

“Reliable, good solid pieces of equipment that have lasted”

Versatile and adaptable, to meet varied production requirements

Thanks to three standard sizes of honed pump sets, fill volumes can range from 10ml to 1 litre in a single shot. Eve Taylor’s production team can swiftly switch from filling 10ml glass bottles of oils, up to 200ml toner tubes, as required.

Saves time and money

Exceptional filling accuracy of $\pm 0.25\%$ means that very little product is wasted during the filling process. 3 minute single-tool strip-down saves time when changing between different products and containers, resulting in less costly production downtime.

Unsurpassed hygiene

Critically for personal care products, all parts which come into contact with Eve Taylor’s skincare products on the Response Benchtop Filler are manufactured in 316L pharmaceutical grade stainless steel, PTFE and Viton. Curved and sloping surfaces meet GMP requirements. Clean, lubricant-free pneumatics and sanitary tri-clamp hopper connections prevent unhygienic build-up of residue.

“When we’ve looked at other cheaper machines, in the long-term this would have been false economy”

A more sustainable choice

Both Adelphi Manufacturing and Eve Taylor have environmental considerations at the heart of their ethos, and are proactively undertaking serious initiatives to reduce their carbon footprint. Both companies even use the same biodegradable starch packaging peanuts, for posting products!

“Outstandingly efficient customer service and support” ~ Artisan manufacturer recommends Adelphi

Adelphi Manufacturing customer FARMERS' Welsh Lavender Ltd are the only distiller of lavender oil in Wales, and proudly farm their lavender on a windswept hillside North of the Brecon Beacons. Alongside their trademark oil, they manufacture lavender-inspired bodycare products, including creams, lotions, scrubs, washes and more.

Complete After-Sale Support

Welsh Lavender have come a long way from their humble beginnings in 2003, when owner Nancy Durham planted her first lavender field; they now employ ten members of staff at their home site, all with a passion for the products and their local area. Welsh Lavender products are now stocked globally, as far afield as Amsterdam and Hong Kong.

Adelphi Manufacturing are proud to have been able to facilitate this journey; in 2012, when Nancy was ready to take the plunge and investigate the first steps into automation, she discovered Adelphi via an internet search engine, and the rest, as they say, is history.

Nancy stressed that finding a company who could offer prompt servicing and maintenance when required, was “a real priority”. Adelphi Manufacturing's after-sale team provide complete spares and servicing support, wherever our customers are in the world.

Quick to assemble and clean - get started immediately!

Adelphi Manufacturing's Sales Team were pleased to recommend the Response Bench-top Filler to suit Welsh Lavender's requirements, as it is quick to calibrate to different volumes of product; Nancy is filling aluminium and plastic jars in volumes from 30ml to 150ml, as well as bottles of up to 300ml.

The Response is quick to assemble and clean, meaning that changing between products is as easy as possible and production downtime is kept to a minimum. This, enthuses Nancy, was “a great first step” for a business the size of Welsh Lavender. She says that the machine “was working smoothly from day one”, and fondly describes it now as “like an old friend”, as indeed Adelphi has become to Welsh Lavender.

Quick to assemble and clean - get started immediately!

The “outstandingly efficient customer service and support” was something that, for Nancy, set Adelphi Manufacturing apart. “I never feel that my questions aren't valued, and it's never like a hassle”, she said. “Without hesitation, I would enthusiastically recommend Adelphi Manufacturing to a contact!”

The Adelphi Group of Companies

Adelphi Manufacturing

Adelphi Manufacturing offers manual and semi-automatic equipment designed to aid the efficient opening, filling, closing and inspecting of a variety of containers such as capsules, ampoules, vials, syringes, tubes and bottles. It also offers a range of pharmaceutical dispensing equipment, and is the sole UK agent for TGM tube fillers and ROTA ampoule fillers.
