

# ADELPHI MANUFACTURING

## RESPONSE VOLUMETRIC FILLERS

Adelphi manufactures the highly regarded Response range of filling machines, ideal for small to medium batch production environments.

### *Response*

#### Benchtop Filler

Adelphi manufactures the highly regarded Response benchtop volumetric filling machine, and can deliver reliable after sales support wherever you are in the world. This pneumatically driven filler is suitable for filling liquids, creams or solids in suspension thanks to its versatile filling head design.

The Response is adaptable, accurate, hygienic and easy to use. It is available in single or twin-head configurations, with a comprehensive range of nozzles, hoppers and other accessories available to meet your individual requirements.

These machines are ideally suited to those wanting to start automating a previously manual filling process, and those that don't currently require the output levels offered by a fully automated solution. However, once production demands increase, Response units can be mounted onto an Automation Base to create an extremely flexible fully automatic filling machine.

With pipe feed attached, for liquid fills.

## Response

### Bag/Pouch Filler & Sealer

The Response Benchtop Filler is integrated into the Response Bag/Pouch Filling and Sealing solution.

As an entry-level system, this machine is aimed at small-scale producers who want to offer their products in bags and/or pouches.

Suitable for food, cosmetic, toiletries, pharmaceutical and chemical applications, the bag and pouch filler includes a bag-blowing station, diving cut-off nozzle, hot-jaw sealing station and eject station, and features tool-free changeover. The bags/pouches are blown and placed by hand and indexed at the touch of a button. Liquids, creams, 'chunky' products and pastes can all be filled into bags or pouches up to 500ml, at speeds of up to 10 units per minute.

#### Key Features and Benefits:

- Space-saving design
- Quick strip down for cleaning
- Hygienic stainless steel construction; all wetted parts are 316L stainless steel
- Response Benchtop Filler fill-accuracy +/- 0.25%
- Quick and easy to change parts from one fill-size or product to another
- Designed to effectively handle liquids, oils, creams, pastes and solids in suspension
